

Jemmtc

It's pronounced "Gem Tech"

Tech Stack

Mobile App

- React Native
- Expo Go

Dashboard App

- [Next.js](#) React app

Backend/Database

- Orbib DB

Credits

Jay - Orbitdb

Ethan - Database, backend, architecture

Maddax - Dashboard Application

Matthew - Database and Frontend Connections

Tyler - Mobile Application

Coral - UI design, diagrams

Biggest Challenge

Trouble running the project

- Multiple machines refused to run the project
- Errors with hardware
- 4/6 machines worked

Technical Decisions

Best

OrbitDB for our distributed database

- Easy
- Decentralized
- Effortlessly scalable

Worst

ReactNative

- Just didn't like it

Waiting so long to dockerize/cloud deployment (CI/CD pipeline)

- Would have been nice to do first
- May have solved our machine issues
